January 2017

GoFree® Flex Pro Update

The enhanced GoFree Flex Pro is available February 2017 with the new state-of-the-art Lithium Ion battery and approximate 75-minute runtime. The GoFree Flex Pro cordless backpack vacuum now cleans 30+ percent faster than a corded backpack and 5x faster than an upright vacuum. Durable, reliable, and more comfortable than ever, the GoFree Flex Pro provides ultimate cleaning freedom.

The new motor upgrade is being developed so customers can upgrade older GFFP vacuums to the new motor. More information on SKU #510411 and pricing will be forwarded once available. The visual identifier is the enhanced productivity icon on body decal.

The new battery is compatible with the old unit but will only have the 75-minute runtime if used with new motor. Runtime is approximately 60-minute if used with old motor. This battery features up to 850 recharge cycles and control circuit for state-of-the-art performance. The visual identifier is a purple locking knob and new serial number format.

The new charger features a fast charge time of only 2.5-3 hours for a full charge and easy-to-read charge status lighted display. The visual identifier is the light grey label (not black) with 4 columns of text above indicator lights and new serial number format.
