

PROTEAM GOFREE® BATTERY and CHARGER REPLACEMENT PROGRAM

All GoFree and GoFree Flex Pro batteries and chargers produced prior to 2017 are subject to the Important Safety Notice dated March 2016. This bulletin tells you how to prepare your affected batteries and chargers for proper recycling and/or disposal. It also tells you how to order replacement batteries and chargers.

We are sending you a “Lock-Out Cover” that will snap onto any battery that is subject to the Safety Notice and cover its terminals. Once in place, the cover will prevent a battery from being used or recharged before it is properly recycled. The cover will also help distinguish between the old batteries and our new replacement batteries.

- **Do not run or recharge the old battery before attaching the cover.**
- **Be sure the cover is securely attached before recycling your old battery.**
- **Do not use your old charger with either old or new batteries.**

ATTACHING THE LOCK-OUT COVER IS SIMPLE:

On a stable surface, place the battery right-side up, with connectors on the top. Align the Lock-Out Cover over the guide rails on the top of the battery as shown below in **Figure 1**. Firmly press downward until the tabs on the cover snap into the rectangular holes on the sides of the battery guide rails. An audible “clicking” sound should be heard when the cover is securely fastened to the battery. Pull the cover in several directions to ensure it is securely attached. See **Figure 2** below for final assembly.

Before recycling your battery and recycling or disposing of your charger in accordance with your local requirements, please record the serial numbers located on the rear panel of the battery and charger. Have them available when you order your replacement battery and charger.

To order a replacement battery and charger, please contact ProTeam Customer Service at 1-866-888-2168 or at customerservice.proteam@emerson.com and a new replacement battery and charger will be sent to you at no charge. Customer Service also can help you obtain additional Lock-Out Covers if needed.
