What could you do with an additional 11.2 hrs for every 40,000 ft²?

"The GoFree Pro saves us approximately 45 minutes to one hour off vacuuming time per 100,000 SF. Based on these calculations, our GoFree Pro will pay for itself in seven months."

"The GoFree Pro is a huge selling tool for our company. By saving time through the use of technology, we can reduce our labor expenses. We are then able to pass these savings to our customers."

Brandon Schneider | Co-Owner and CFO of Southeastern Janitorial

The GoFree Pro sets cleaners free from having their paths dictated by the nearest outlet. In recent field tests in school districts in Florida, Texas and Nevada the GoFree Pro shaved 1-1.5 hours off vacuuming time in a 4-hour shift.

"Managing the vacuum cord becomes a body response. Every time you make a turn, you are 100% conscious of the dangers of catching your cord on obstacles. That's what takes the time up. It's constantly working with your cord and having the outlet dictate your path. With the GoFree Pro, you take the path of productivity that you choose."

Rex Morrison | Cleaning Industry Consultant and Trainer

"After putting it to use, I would give the GoFree Pro a big thumbs up. The unit is very comfortable to wear and run time is better than expected. Power is so impressive that you will forget that it is a battery backpack vacuum."
