**GREEN CLEANING
TECHNOLOGY**

ProTeam vacuums provide better Indoor Air Quality (IAQ) and are environmentally responsible:

- A high-efficiency direct suction method of vacuuming that cleans carpet and hard surfaces without stirring up dust.
- A unique Four Level® Filtration system that captures and contains 99.9% of particles with treated filters to prevent mold and bacteria growth.
- Effective and efficient cleaning with less user effort or strain.
- Durable for years – fewer replacement parts and fewer repairs, cutting down on growing landfills.

ProTeam vacuums clean for health—not only appearance

The American Lung Association does not endorse products.
