

Pest Control

Pick Up What Pesticides Leave Behind

**Deep cleaning and pest
management starts here.**

ProTeam filtration makes pest management more efficient
and ensures insect particulates stay out of the air.

 **ProTeam**
Cleaning for Health® Since 1987

Integrated pest management starts with ProTeam.

Remove pests and their by products from flooring, surfaces, and hard-to-reach places. A ProTeam backpack vacuum used with our Integrated Pest Management toolkit immediately reduces pest populations in an environmentally safe way.

ProTeam vacuums combine high-powered suction with exclusive ProLevel Filtration® to capture and contain microscopic particulates – including dead and live specimens, and allergens like cast skins and fecal matter.

In the fight against pests, ProTeam vacuums simply work better.

Pest Management Facts

- Pests contaminate food, as well as kitchen equipment & other surfaces. Pests also infest food items & stored products including grains & dry goods.
- Pests can spread diseases such as Zika virus, West Nile virus, Lyme disease, malaria, plague, Rocky Mountain spotted fever, hantavirus & encephalitis.
- 97% of allergists believe a pest-free environment is an important step in preventing asthma and allergy symptoms.

Count the ways ProTeam backpack vacuums work better against pests.

1. ENVIRONMENTALLY SAFE

Using no chemicals or toxins, ProTeam vacuums permanently remove pests from a space.

2. ROUTINE ELIMINATION

ProTeam backpack vacuums allow cleaning workers to move through a space up to 3 times faster and 44 percent more effectively, so pest management becomes routine.

3. IMMEDIATE IMPACT

Instantly capture pests and contain the allergens, eggs and waste they leave behind.

4. VERSATILE CONTROL

ProTeam's IPM toolkit and high-performance design can control a wide range of pests, including bed bugs, spiders, cockroaches, wasps, beetles, box elder bugs and more.

ProTeam vacuums offer the suction, maneuverability & filtration to stop invasive pests dead in their tracks.

PROTEAM SUPER COACH PRO® 6

- Improved comfort & range of motion
- Increased productivity

PROTEAM GOFREE® FLEX PRO II

- Cordless efficiency
- Enhanced mobility
- Two battery options

Why Go Cordless?

Productivity

Gain the most efficiency with industry leading runtime & cordless freedom. Remove pests with no restrictions.

Labor Savings

With increased efficiency and productivity, spend less time cleaning.

Safety & Trip Hazards

Eliminate safety and tripping concerns when you go cordless. Clean anytime, anywhere, without safety concerns.

STOP

Infestation with High Performance Cleaning and Sustainability

Pests aren't simply a nuisance – they can severely affect health. This is why bug and insect prevention is critical in protecting homes, business, schools and any other place where human beings live, work or play from a pest infestation. Pest management practices are changing to include considerations like health, safety and sustainability.

ProTeam's Integrated Pest Management (IPM) vacuums are a vital tools in pest management as they instantly eliminate cockroaches, bees, dust mites, spiders and other objectionable pests. An IPM system also removes allergens such as cast skins, fecal material, and dead and live specimens. It is important to reduce exposure to such allergens.

103439 Integrated Pest Management Tool Kit includes:

- 102361 Straight Plastic Wand
- 102399 Vibrating Upholstery Tool
- 102663 Mesh Bag
- 102684 Electronic Cleaning Kit
- 103089 Dust Brush
- 103099 Adapter Cuff
- 103505 Curved Wand
- 103523 Crevice Tool (Flexi-Clean)
- 106343 Chrome Telescoping Wand
- 106709 Combination Floor Tool

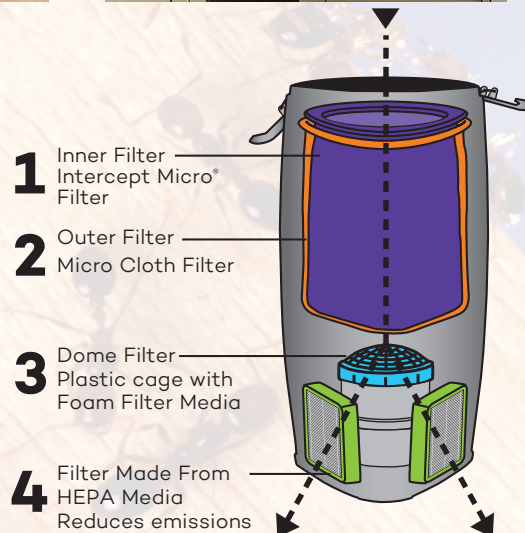

Cleaning for Health® & ProLevel Filtration

ProLevel Filtration technology better captures microscopic dust that can harm health and trigger asthma or allergies. Most ProTeam vacuums have Four Levels of Filtration, each level designed to sift out smaller and smaller particles. The Intercept Micro Filter is the first line of defense.

The unique ProTeam method of suction-vacuuming cleans carpets, hard floors, and other surfaces without stirring up dust – so the air stays cleaner, the furniture collects less dust, and operators can work without breathing unhealthy air.

“One myth is that only people who keep dirty homes get bed bugs. Not true, because poor sanitation practices have nothing to do with bed bugs,” Stoy Hedges of Terminex states. “If you think you’ve found bed bugs, call an experienced professional to come confirm. The most effective mode of eliminating bed bugs is to integrate multiple techniques in the overall control program, plus gaining client cooperation in preparing for the service.

The effective pest management backpack vacuum features high-powered suction and multi-level filtration for a frequently lethal combination to pests. ProTeam offers ProLevel® Filtration to capture and contain microscopic particulates.

ProTeam also offers an IPM tool kit for the Super Coach Pro 6 that includes attachment features like a vibrating tool for uprooting pests from mattresses and floors, and wands for reaching into tight crevices.

“A backpack vacuum provides convenience and ease of use,” Hedges commented. “The ProTeam vacuum provides excellent suction for removal of bed bugs from surfaces and the HEPA media filter helps capture any potential allergens dislodged from surfaces during the process.”

-Stoy Hedges, Pest Control Technical Expert, Terminex
