

THE PROTEAM
5-STAR ADVANTAGE

Five Powerful Benefits. One Clear Choice.

ProTeam®

01: PRODUCTIVITY

02: CLEANING FOR HEALTH®

03: ERGONOMICS

04: COST OF OWNERSHIP

05: SUSTAINABILITY

Clean more in less time for a better bottom line.

35+ years *of cleaning innovation*

With the ProTeam Advantage, your team will benefit from the enhanced freedom, comfort and maneuverability to clean in even the hardest-to-reach places. Our GoFit® Series Corded and Cordless backpack vacuums are the perfect example of this. Your business will enjoy greater productivity, operational cost savings and labor savings, and the ability to take on a wide variety of cleaning challenges. In addition, GoFit Series vacuums are safe – and safe vacuuming keeps your team productively working.

Money saved in annual labor costs

CORDLESS BACKPACK

$119,362*

TIME NEEDED TO VACUUM 100,000 SQ. FT.: *6.3 HRS**

CORDED BACKPACK

$92,645*

TIME NEEDED TO VACUUM 100,000 SQ. FT.: *12.2 HRS**

CORDED UPRIGHT

$0

TIME NEEDED TO VACUUM 100,000 SQ. FT.: *32.5 HRS**

****Annual savings based on the median labor rate for janitors at $17.27/hour wage stated in 2024 US Bureau of Labor Statistics www.bls.gov/ooh/building-and-grounds-cleaning/janitors-and-building-cleaners.htm and The Official ISSA Cleaning Times www.issa.com*

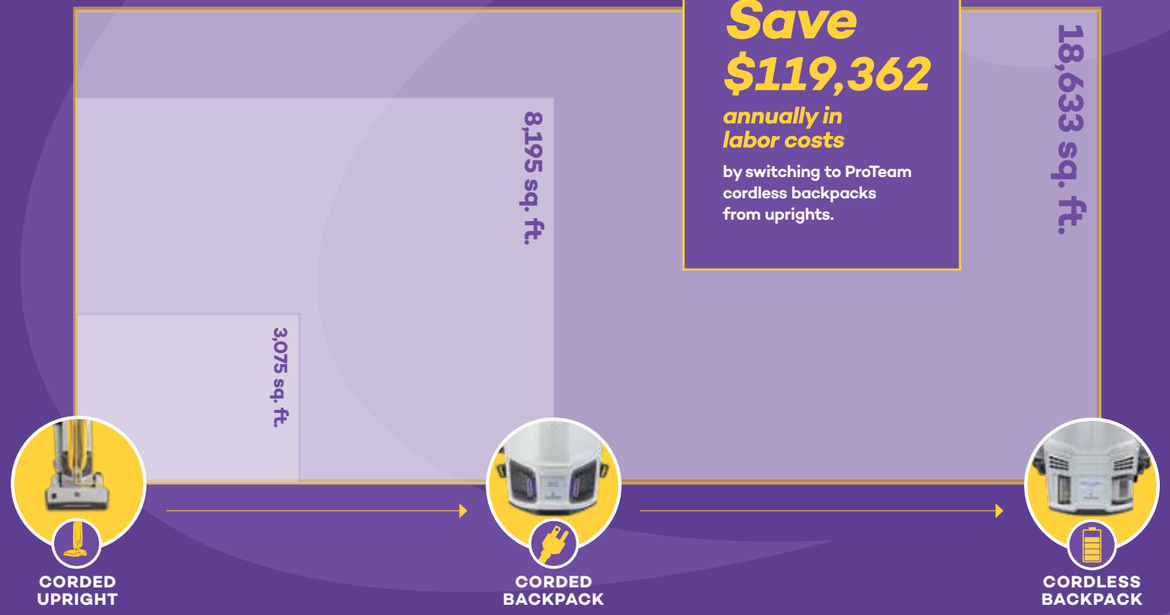

Two great options for expanded productivity.

GoFit Series backpack vacuums are a comfortable fit for every cleaning job, challenge, and team member. Our cordless and corded models are designed to adapt to every environment – big or small, carpeted or hard surface – so you can clean more spaces in less time. It's a great way to empower your team with tools that are lightweight, maneuverable, and built to make every shift easier and more productive.

In one hour, you can clean...

Save $119,362
annually in labor costs
by switching to ProTeam cordless backpacks from uprights.

GoFit Series Corded Backpack Vacuums provide a more powerful cleaning solution. These hard-working backpack vacuums, which include a 3, 6, and 10-quart option, make it comfortable and easy for professionals to use a stress-reducing side-to-side sweeping motion.

MORE POWER TO PERFORMANCE

With GoFit Series backpack vacuums, productivity comes standard. Clean faster, reach more spaces, and grow your business with every pass.

GoFit Series Cordless Backpack Vacuums provide a reduced profile-weight balance. These nimble 3-quart and 6-quart units redefine mobility and productivity while going anywhere, without the constraints and tripping hazards of cords and power outlets.

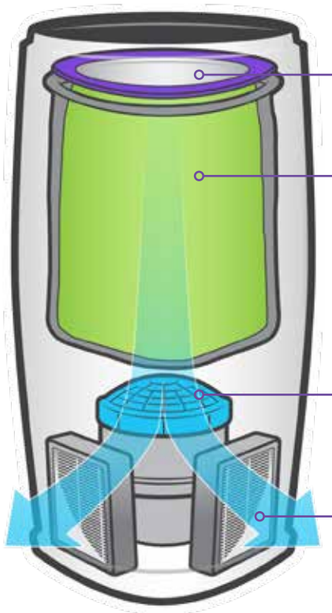

Healthy benefits to help everyone breathe easier.

Americans spend about 90 percent of their lives indoors, with greater exposure to pollutants than outdoor environments. GoFit Series backpack vacuums remove soil and safely contain harmful particles within a ProLevel Filtration® System, featuring multiple levels of filters. Now your team can clean carpets and hard surfaces without stirring up dust. That's something that will help us all breathe a little easier.

ProTeam GoFit Series backpack vacuums with ProLevel Filtration are up to

99.9% effective

at capturing and containing particles.

Around 300M people worldwide have asthma and likely by 2026 a further 100M may be affected.

Allergens are the 6th leading cause of chronic illness in the U.S.

CLEANER SPACES START WITH CLEANER AIR.

ProTeam GoFit Series vacuums capture and contain dust, dander, and allergens through advanced multi-level filtration that improves indoor air quality (IAQ).

17 studies found positive health impacts from improved indoor air quality.

Approximately 13.8-million school days and 14.2-million work days are missed each year due to asthma.

American Lung Association. NATIONAL PROUD PARTNER
We Support Healthy Air | Lung.org

The American Lung Association does not endorse product, device or service.

A partner in promoting indoor air quality.

ProTeam is a proud partner of the American Lung Association. Together, we fight for clean indoor air so that we all can breathe easier. We spend the majority of our time indoors, so breathing healthy air where we live, work, and play is critical. It's more than just removing harmful materials, it's creating a state of social, physical, and mental well-being.

Designed for the way you move.

Cleaning shouldn't be a workout. That's why we design cleaning resources that are the right fit for your team and your cleaning goals. For example, GoFit Series backpack vacuums are designed for all body types, including smaller frames, and offer new levels of comfort and efficiency. That means your team can work smarter, not harder. And they can clean even large areas using only half the energy and effort as compared to other vacuums and cleaning units.

1/2
the energy and effort
to clean the same area as it would take with a commercial upright vacuum

Natural posture meets enhanced performance

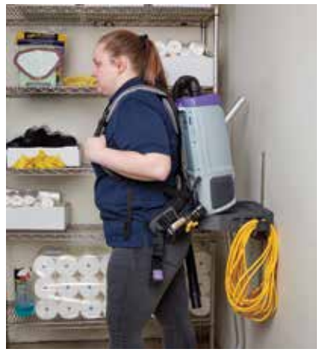

Unlike traditional upright vacuums that force users to hunch over repeatedly throughout the day, ProTeam backpack vacuums keep your team upright and moving naturally, promoting worker safety and comfort.

Less stress, more comfort for team members.

ProTeam backpack vacuums are ergonomically engineered to fit the body's natural posture, reducing strain and fatigue throughout the day. Our FlexFit® harness system works with a wide range of users and features more comfort enhancements compared to older models, reducing user fatigue and minimizing stress on pressure points by up to 20% as compared to standard harnesses. Comfort isn't just a perk – it's a competitive advantage.

More power for how you work

The ProTeam Vac Station enables quick charging for up to two batteries and offers convenient wall-mounted storage for GoFit Series backpack vacuums, keeping them organized and off the floor. This design enhances workspace efficiency and ensures easy access for users of all heights.

Stay comfortable while being more productive.

Our interchangeable, quick-adjust harnesses are easy to adjust, put on, wear, and take off. In fact, most people who try one of our cordless backpack vacuums report that they hardly notice they're even wearing it. Give your team the ability to move effectively and efficiently. When your team is free to move, you're free to do more with your business, too.

QUICK-ADJUST HARNESS
No tools required - quick adjust system moves upper harness up and down to fit users perfectly.

INTERCHANGEABLE HARNESS
Allows each user to have their own custom-fitted harness.

INCREASED BREATHABILITY
Increases air circulation, reducing warmth and moisture accumulation.

WIDER AND LONGER LOWER HARNESS
Distributes the weight of the unit for greater comfort.

Our 4-step quick-adjust harness system offers new levels of comfort.
Adaptable to all body frames and numbered with intuitive touchpoints for a custom, comfortable fit, this harness is designed to rest comfortably on the user's hips for hours of wear and productivity – **all with no tools required.**

Adjust the upper harness height for customized balance and fit.

Buckle and adjust the sternum strap, then hit the power and get your clean on.

Adjust the shoulder straps to turn comfort up a notch.

Buckle the waist belt and pull the loose ends for increased weight support.

Get more from your yearly investment.

Gain 20% in savings every hour – your entire backpack vacuum investment can be recouped in less than 14 vacuuming hours because of greater productivity. You and your team will enjoy the benefits of low-maintenance backpack units and long-lasting performance supported by multi-year warranties and over three decades of innovation.

Save more with every cleaning

Lower maintenance. Longer life. Smarter investment. ProTeam vacuums are built to deliver dependable performance year after year, with fewer moving parts and minimal repair costs. In fact, annual maintenance averages just $60 compared to $184 for traditional uprights. That means fewer breakdowns, less downtime, and more dollars saved. When your equipment works harder for less, your bottom line benefits more.

Fewer parts. Greater cost savings.

Reduce your maintenance and repair costs with GoFit Series backpack vacuums. Designed for years of reliable cleaning, these hard-working performers feature only two moving parts: the switch and the motor. Compare this to upright vacuums which typically have over 50 moving parts that can wear out or break down. Our backpack vacuums are the smart choice for every cleaning company and every budget.

A cleaner planet begins here.

Our commitment to sustainability runs deep, from energy-efficient engineering to products that last longer and waste less. Our products are designed with fewer raw materials and less parts to replace, resulting in durable products for longer life and performance. We also ship products in recycled packaging helping to ensure everything reaches our customers in the most sustainable way.

Get ready to keep going and going with equipment designed for the long haul. These cordless backpacks are designed and built to provide years of proven performance to help you make the most of your investment. They are the smart choice for companies that take on the toughest cleaning challenges, year after year.

Built to minimize environmental impact.

Sustainability isn't just about saving energy – it's about designing smarter from the start. Every GoFit Series backpack vacuum is engineered for maximum efficiency, minimal waste, and a longer product life cycle. Durable components mean fewer replacements and less material consumption over time. By combining high-performance filtration with low environmental impact, the GoFit system helps organizations clean responsibly without compromising results.

What does that impact look like?

If 1% of U.S. commercial floor space was cleaned using the GoFit Series cordless backpack vacuums (vs. uprights), we would

save 20M kWh of electricity per year.

Seamlessly Upgrade Your Team to the Latest Innovation

With GoFit Series backpack vacuums, you can get the most advanced features and latest technology all for the same price as new Super Coach® Pro and GoFree® Flex Pro II models. No risk, all reward. All your current accessories, filters, power cords, and consumables remain fully compatible with GoFit units, making the transition cost-effective and practical.

Compare these models to see how the GoFit Series advances proven ProTeam performance with smarter, more ergonomic innovation.

The GoFit Series' slimmer profile is streamlined for comfort and ease, even to its single latch access to filters and bags.

SUPER COACH PRO 6 QT.

GOFIT CORDED 6 QT.

The GoFit Series provides a lighter, more compact design that offers superior all-day comfort, maneuverability, and ease of use.

GOFREE FLEX PRO II 6 QT.

GOFIT CORDLESS 6 QT.

The 4-Step Harness on the GoFit Series is adjustable to a wider waist belt, offers fabric weave for better air flow and wider range of sizing for more comfort.

Why Upgrade Now?

ENHANCED ERGONOMICS

The new 4-step quick-adjust harness works with a wider range of users and features more comfort enhancements compared to older models, reducing user fatigue and improving productivity throughout the workday.

EXPANDED FLEET OPTIONS

Add the 3-quart model to your fleet for smaller users or those hesitant to try a backpack, while maintaining consistency with your existing 6- and 10-quart units.

IMPROVED USER EXPERIENCE

Tool-free harness adjustments and the quick-adjust system accommodate diverse workforces more effectively, reducing training time and improving adoption rates.

BACKWARDS COMPATIBILITY

Maximize your equipment investment with ProTeam's backward-compatible design. Filter bags, power cords, and accessories work seamlessly across Super Coach Pro and GoFit Series models, eliminating the need to restock consumables when upgrading.

MAINTENANCE SIMPLICITY

ProTeam's engineering philosophy of fewer moving parts translates to reduced maintenance complexity. With only 2 moving parts compared to approximately 50 in traditional uprights, ProTeam backpacks require minimal service training.

Upgrade your competitive edge with improved ergonomics, easier adjustments, and more model options to fit every user. The GoFit Series is built to integrate with the accessories and workflows you already trust, making the move to ProTeam's newest generation an easy, low-risk choice, all rooted in the same dependable performance you already know.

ProTeam®

Our complete line of vacuums and air movers delivers the right tool for every task, each designed to improve efficiency, extend equipment life, and maintain healthier environments.

Whatever the space, whatever the challenge, there's a ProTeam solution engineered to perform from the brand you've trusted for over 35 years.
