# The Super Coach Pro®
# — Unmatched Cleaning, Reliability, and Comfort

**As president and CEO of Service Keepers, Neal Berman** has unique insight into the company's broad portfolio of clients and their needs. The Miami based business has been a trusted cleaning partner to a wide variety of industries for more than 30 years. Whether Service Keepers is cleaning elementary schools, high schools, colleges and universities, high rise office buildings, high rise condos, manufacturing facilities, or healthcare institutions, they aim to provide the highest level of service.

At Service Keepers, they don't just clean for appearance; they clean for health — this is why they have used ProTeam for more than 20 years. While Service Keepers utilizes most of the variety of equipment ProTeam offers, the Super Coach Pro 6 is their vacuum of choice.

With more than 200 employees, 50 plus clients, and over 5 million square feet to clean, the Service Keeper team is at it day and night. This group of highly trained professionals is responsible for cleaning and maintaining a variety of surfaces. Berman can list a host of reasons why the Super Coach Pro 6 is the go-to backpack vacuum for Service Keepers. At the top of that list are unmatched cleaning, reliability, and comfort.

## Industry Leading Cleaning

Berman prefers the Super Coach Pro over other vacuums; he said, "Their filtration system is incredible; you really notice a difference, especially if you have allergies."

Known for its superior cleaning and portability, the Super Coach Pro is something Service Keepers employees enjoy using, but it's more than that — it's a backpack vacuum that meets the needs of a wide variety of clients.

With such a broad customer base and so many different types of buildings to maintain, finding a vacuum that works for a variety of surfaces and can clean hard-to-reach places may sound like a difficult task; however, the Super Coach Pro 6 answers the call.

"The six quart corded version is the perfect solution for us," Berman said, "It's lightweight and ideal for cleaning a variety of floors, vents, baseboards, around tight corners, upholstery, and furniture."

> "It's one of the best inventions in the cleaning industry in the past quarter of a century. We've been using ProTeam for over 20 years for a reason."

Combine the Super Coach Pro's incredible cleaning power with its increased efficiency, and people take notice. "I feel comfortable saying efficiency time is cut in half going from uprights to ProTeam," states Berman.

However, the benefits of using ProTeam products go far beyond superior cleaning and efficiency.

## Reliability Can Never Be Overrated

For Berman, reliability is just as important as performance — he wants both out of his team's tools so they can do the best job possible.

Berman feels the backpack vacuums in his current Service Keeper fleet outperform uprights. He stated, "The reliability is night and day compared to uprights. You rarely have a problem — very little downtime."

The support Service Keepers has received in working with ProTeam has made for an incredibly positive experience. Berman explained, "The customer service is great, we rarely have a problem, but if we do, they'll (ProTeam) fix it."

## Top-Notch Comfort Makes For Happy Employees

Berman and the Service Keeper crew also prefer backpack units because of the superior comfort. "In fact," Berman said, "shoulder pain is gone for our staff. This backpack vac is so much less strenuous to use."

The ergonomic design of the Super Coach Pro 6, its maneuverability, and the minimal weight of the corded version have positively impacted employee health. Berman said, "Since switching to ProTeam backpacks, I don't believe we have had a single injury related to them, which is incredible."

## One Of The Best Inventions

With more than 100 Super Coach Pro 6's and 20 Super Coach Pro 10's in the field, Berman and the crew at Service Keepers are big fans of what ProTeam has created.

"For us," Berman said, "it's one of the best inventions in the cleaning industry in the past quarter of a century. We've been using ProTeam for over 20 years for a reason."
